Oh, sorry, I didn't realize you needed the spreadsheet back, thought you just needed certification (and I was late with that – sorry again!). After review and discussion of revisions needed to text, I met with Maureen Johnson and Cheryl Itkin and we made all the changes in real time so I didn't put any comments in the third column. I just did a quick screen and all are fixed.

MC,

Just a quick check-in regarding the SI record review and clean-up exercise.

We proposed a three-step process –

1. Review to decide which records needed improvement by end of April.
2. Edit records needing improvement in SI by May 18.
3. Notify me when you have completed the process

We have 7 work days remaining to complete the effort. I have received one notification of completion from NCER. If you are still working it, that is great, please send a note when you are done.

Below are stats regarding the number of records edited by LCO. These clearly demonstrate a lot of work on this effort. 45% (375 of 831) of the 2017/18 publication records that we asked to review were updated in April. Thanks for your efforts.

Count of SI Record LCO	Column Labels		Total For Review
	Not Edited	Edited	
IO	6		6
NCCT	12	10	22
NCEA	16		16
NCER	2	3	5
NERL	195	50	245
NHEERL	145	154	299
NHSRC	66	13	79
NRMRL	14	144	158
OSA		1	1
Grand Total	456	375	831
